Changelog

What changed in each version.

Not released yet

Added

- Project setup: CMake build with presets for Windows (llvm-mingw, MSVC), Linux and macOS.
- The core library (ofscore), the file formats library (ofsformats), the shared Lua library (ofslua) and the M.U.G.E.N engine plugin.
- Engine plugins are found and loaded, with a version check.
- Unit and GUI tests (Catch2, QtTest) and automatic builds.
- Themes: the Dark (default), Light, Classic and Ultimate interface styles, the six color sets, and the Nuvola, Flat-Dark, Flat-Light, Classic and Ultimate icon sets with their M.U.G.E.N extras, made from openly licensed icons by tools/iconsets/build_iconsets.py.
