Third party notices

Open Factory Studio is under the GNU General Public License v3.0 (see LICENSE). It uses these parts made by other people, each under its own license. The ones marked "only for building and testing" or "only for tools" are used to build or test the program and don't come with it.

Part	Version	License	What it does
Qt	6.8	LGPL-3.0 / GPL-3.0	The program's windows and widgets (linked dynamically)
Lua	5.4	MIT	Scripts, presets and templates
sol2	3.5.0	MIT	Connects Lua to the C++ code
LodePNG	20261001 (commit ff206aa)	zlib	Reads and writes PNG files. Copied unchanged into third_party/lodepng
uchardet	0.0.8	MPL-1.1 / GPL-2.0-or-later / LGPL-2.1-or-later (used under the GPL)	Finds out the encoding of text files. Built unchanged from the release archive
hqx	1.2	LGPL-2.1-or-later (used under the GPL)	The hq2x, hq3x and hq4x filters for resizing sprites. Built unchanged from the release archive
Catch2	3.16.0	BSL-1.0	Unit tests (only for building and testing)
Nuvola icon theme (David Vignoni)	1.0	LGPL-2.1	Pictures in the Nuvola, Classic and Ultimate icon sets (data/iconsets, data/engines/mugen/iconsets)
Tabler Icons	3.48.0	MIT	The Flat-Dark and Flat-Light icon sets, and the letter and number shapes in drawn icons
Lucide	1.51.0	ISC (icons taken from Feather: MIT)	The Flat-Dark and Flat-Light icon sets (clapperboard, joystick)
Pillow	12.3	MIT-CMU	Tools that make the icon sets and logos (only for tools)
PySide6	6.11	LGPL-3.0	Draws SVG files in the icon set tool (only for tools)

Each icon set folder has a Sources.pdf that says which picture each file comes from, plus copies of the licenses that apply. Icons and style pictures marked as drawn were made for Open Factory Studio and are under the program's GPL-3.0 license.

These were used to learn how the file formats and the engine work. No code was copied from them unless it's in the table above.

- Elecbyte's M.U.G.E.N documentation (the file formats and the language).

- IKEMEN GO (MIT), to see how M.U.G.E.N behaves, including how SFF sprites and SND sounds are read (src/image.go, src/sound.go). Our formats library was written separately.

Qt

Qt is under the GNU Lesser General Public License version 3 and the GNU General Public License version 3. Open Factory Studio links Qt dynamically, so the Qt libraries that come with the downloads can be swapped for other builds that work with it. Qt's source code is at https://download.qt.io/ and https://code.qt.io/.

uchardet

uchardet is the Universal Charset Detector, a C++ library based on Mozilla's charset detectors. Its source files are under three licenses: the Mozilla Public License 1.1, the GNU General Public License version 2 or later and the GNU Lesser General Public License version 2.1 or later. Open Factory Studio uses it under the GNU General Public License (version 3, see LICENSE). The original source is at https://www.freedesktop.org/software/uchardet/releases/.

hqx

hqx has the hq2x, hq3x and hq4x filters made by Maxim Stepin. Copyright (C) 2003 Maxim Stepin, (C) 2010 Cameron Zemek, (C) 2011 Francois Gannaz. It's under the GNU Lesser General Public License version 2.1 or (if you want) any later version. Open Factory Studio uses it under the GNU General Public License (version 3, see LICENSE), which section 3 of the LGPL allows. The build compiles the library's init.c, hq2x.c, hq3x.c and hq4x.c unchanged from the v1.2 release archive (https://github.com/grom358/hqx/archive/refs/tags/v1.2.tar.gz, SHA-256 5a44f1745b7fb0321c1d244822d79505df7cf85cfe383ee70b16f5bcd6803396).

Catch2

Under the Boost Software License, Version 1.0 (https://www.boost.org/LICENSE_1_0.txt).

Nuvola icon theme

Nuvola icon theme for KDE 3.x, version 1.0. Copyright (c) 2003-2004 David Vignoni (ICON KING). It's under the GNU Lesser General Public License version 2.1, with the author's note saying that the LGPL applies to this set of artwork, that its source code is the PNG pictures, and that the exception in section 6 covers using its pictures in a program's interface. The full license and the author's note come as LICENSE.Nuvola.txt and README.Nuvola.txt in each icon set folder that uses Nuvola pictures. Open Factory Studio uses the PNG pictures from the archive nuvola-1.0.tar.gz, some of them resized, recolored or put together, and the changed pictures stay under the LGPL-2.1.

Tabler Icons

WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN
ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF
OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Icons that Lucide took from the Feather project are under the MIT License, Copyright (c) 2013-present Cole Bemis. The full Lucide license file, with that notice, comes as LICENSE.Lucide.txt in the Flat icon set folders.

Pillow and PySide6 (only for tools)

Used by tools/iconsets/build_iconsets.py to make the icon sets. They aren't part of the program. Pillow is under the MIT-CMU license and PySide6 under the GNU LGPL version 3.
